LESSON 3

Arrays

Welcome to my e-commerce site!

- How many items will our customer buy?
 - How can we create variables for their items?
- `var item;`
 - `var item1;`
 - `var item2;`
 - `var item3;`
 - `var item4;`

Arrays

An array is an ordered collection of items.

My Books

1. The Art of War
2. Gulliver's Travels
3. Jane Eyre
4. Sleepy Hollow
5. The Invisible Man

Arrays

In JavaScript an array can hold multiple values with one variable.

```
var myBooks =
```

In Today's Class You Will...

- Use arrays to store related values
